PROFILE

I'm a highly motivated software engineer with a strong background in full-stack development. I thrive on tackling complex problems and turning innovative ideas into practical, efficient, and user-friendly software solutions. My mission is to drive technological advancements and make a meaningful impact in the tech world.

WORK EXPERIENCE

Web Developer

september 2023 - Present

- Led the development of a university website redesign project, focusing on improving user experience and information accessibility.
- Utilized HTML, CSS, JavaScript, and the WordPress CMS to create and manage web pages.
- Successfully implemented responsive design, resulting in improved mobile user experience.
- Collaborated with a multidisciplinary team to ensure the project's success.
